

16. Analyse économique et financière d'un projet CSP

16.1 Evaluation des couts

16.2 Evaluation des couts et des performances

Short Bio :

Dr. Gilles Flamant is Director of the Laboratory for Processes, Materials and Solar Energy (PROMES) at France's national scientific research centre (Centre National de Recherche Scientifique – CNRS).

Dr. Cyril Caliot is a CNRS researcher at the Processes, Materials, and Solar Energy (PROMES) laboratory (France). His research topics cover mainly the field of coupled heat and mass transfer modeling at high temperature (including radiation) in solar reactor and receiver.

PROMES (Processes, Materials and Solar Energy Laboratory) is a CNRS Lab located in Odeillo (France). The Lab's mission and scientific objectives are mainly focused on Concentrated solar energy – High temperature materials – Thermal storage – Solar fuels – Solar thermal electricity - Concentrated PV.
